

WE'RE HIRING!

POSTDOCTORAL FELLOW

The **SimTigrate Design Lab (SDL)** is seeking a Postdoctoral Fellow to work on research programs linking the design of the built environment to experience, health and organizational outcomes. Primarily, the Posdoc would help the SDL team investigate how design can help empower individuals facing mild cognitive impairment (MCI).

Job Description

- Design, conduct, analyze and write up the research
- Participate in or lead classes in the College of Design

Qualifications

- PhD or doctoral degree in Architecture or a related field
- Good analytical, verbal and writing skills in English
- Comfortable using MS Office and SPSS

Preferred Qualifications

- Experience leading and/or working with teams in research studies related to design, built environments, psychology, architecture and/or industrial design.

This is a one-year position with a possible extension for up to three years based on funding and performance reviews.
